

# WARREN COUNTY SPECIAL SERVICES SCHOOL DISTRICT

## VISION STATEMENT

We believe that it is our responsibility to educate the whole child to become an independent productive citizen.

We believe that a successful student will achieve a positive attitude toward learning and generalize knowledge to everyday situations.

We believe that an excellent school educates the whole child, provides a safe, secure, environment, embraces the community, and respects students, staff and families.

We believe that an effective classroom meets the needs of all students and challenges them to reach their fullest potential, generating a lifelong love of learning.

We believe a first-class school administrator is one who effectively communicates, actively listens to staff, students, and parents, and guides staff to work collaboratively to increase student achievement.

We believe a successful school staff works as a team to put students first, communicates openly and accepts different ways to achieve success. This collaborative network strives to learn new ideas and values one another.

We believe that a quality instructional and therapeutic program includes a well-organized plan designed to meet the physical, emotional, educational, social, and communication needs of the student. It emphasizes the importance of interdisciplinary collaboration among its highly qualified staff.

The focus of our vision as we reach into the 21<sup>st</sup> century is that all special needs children are our children, and we take responsibility for and pride in the high-quality, educational and therapeutic services we provide. We will continue to assert ourselves as leaders in special education.
